Allowable Subject Matter

Claims 11-17 are allowed.

The following is an examiner's statement of reasons for allowance: patentability resides, at least in part, in the plug comprising a triggering device disposed in the housing and configured to actuate the ejection mechanism; a strain relief device cooperating with the triggering device so that a pulling force from a pulling of the cable acts on the strain relief device to trigger the triggering device, a rocking element rockingly supported in the plug housing and moveable between a first position, in which the rocking element retains the triggering device against the spring, and a second position, in which the rocking element releases the push-out device in response to the pulling force against the strain relief device, the rocking device further includes two hinge pins located in an axis of rotation and a bridge element extending below the push-

out device and connecting the two hinge pins, the bridge element having a latchbolt-shaped surface and a retaining element disposed so as to act on the plunger, and to be acted upon by the biased spring and providing a latching connection with the latchbolt-shaped surface, in combination with the other limitations of the claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
